

STRONGER, LIGHTWEIGHT WINDOW WALL SECTION

MORE DESIGN FLEXIBILITY

The 60mm heavy duty mullion offers fabricators even more options now when using the Window Wall system.

Some of the benefits of the new mullion are the following:

- ➔ Ideal for use with 60mm wide profile range.
- ➔ Based on 1000Pa - can accommodate heights up to 2600mm with 1200mm centre-to-centre modules.
- ➔ Flush on the inside of frame which means it will not interfere with curtains.
- ➔ Fully compatible with the Window Wall Pneumatic Punch tool.
