RE-DESIGNED SHOPFRONT BEAD

The diagrams below indicate the current & future alternative interchangeable designs of the NuKlip bead LMSL.

Some of the benefits of the new improved NuKlip shopfront bead are the following:

-  Hollow design offers improved strength
-  Small adjustments to gasket slot size facilitated easier "slide-in" of butterfly gasket
-  Hollow design is fully interchangeable with solid version - no stock challenges

Stock of the hollow version is available now
