

NEW RANGE OF FRICTION STAYS

Exciting new range of friction stays

HBS now offers a complete range of friction stays that can be used across all branded systems. The process of sourcing the correct stay at the right price has been a long process and we are very excited about our new reduced but more versatile range of stays.

All of our “newly” developed systems like Window Wall, Advantage & Explorer are designed around a 16mm stack height friction stay – reasons being sash sizes are bigger than conventional casement window systems and the use of double glazing requires a bigger / stronger friction stay.

We have also introduced a HD type friction stay for the 13mm stack range to assist with some of the bigger sashes. All friction stays will look typically like this:

NEW RANGE OF FRICTION STAYS

New HD top hung stay for Nuklip Casement

HJ200 is a 14mm stack, 450mm long TOP hung friction stay that could be used with NKTESA & NKCASA sashes. The specifications of this stay:

- 31kg max sash weight
- 1200mm max sash width
- 1000mm max sash height
- 30 degree opening
- 20 degree limit block for use of 20kg
- 304 stainless steel

Wider selections of stays for 16mm stack height range

HBS now offers a complete range of stays within this category. These friction stays can be mounted on all the sashes of Window Wall, Advantage, Explorer and NKCASS (super sash of NK Casement).

NEW RANGE OF FRICTION STAYS

- 34kg max sash weight
- 700mm max sash width
- 1700mm max sash height
- 90 degree opening
- 304 stainless steel
- Always used with anti-drop blocks

NEW RANGE OF FRICTION STAYS

Tested to destruction

Although the friction stay manufacturer has produced certification for the product, HBS has taken the opportunity to mount stays on all types of sashes in order to confirm max sizing/weight specifications given by the manufacturer. Below is a picture of in-house friction stay testing.

Pricing & Stock

Compared to previously stocked imported models, HBS has managed to offer a better performing friction stay at a reduced price – in some cases the saving is more than 50%!

NEW RANGE OF FRICTION STAYS

Stock of all the stays are now available and will be listed in the new version of QQ which will be released in October 2018.
