SANS 613:2011 Excl. par.5.7

DESCRIPTION

PERFORMANCE CLASS						
A1	A2	A3	A4	A5	A6	INDICATE
1000	1500	2000	2500	3000	3500	

PART D: Terms & Conditions

Page 2 of 2

1. HBS Test Centre offers the largest window and fenestration test laboratory in South Africa.

Testing is done in accordance with SANS 613:2011 (excl. par.5.7)

2. Products can be tested up to A6 rating where pressures can reach 6000Pa (600kg/m²) - 3000*6000mm is the maximum size.

3. Refer to the current national price list for cost of testing – code ARYZ4000.

4. Once test drawings are approved, a test date will be agreed upon in writing.

5. The invoice will be issued or debited from your account after the test is completed.

6. The test will run over 4 days, to allow for pre-testing. The sample delivery is 3 days prior to the test. HBSTC will run the first

7. On the date of the SANS 613 excl. par. 5.7 Test, testing starts at 9:00am

8. All external parties that need to be present at the test have to be there on time.

9. The test will take 3-4 hours to complete.

10. HBSTC shall notify a customer in writing when it has to place customer information in the public domain or if confidential information needs to be released due to a legal requirements. Information generated during lab activities will be reviewed by SANAS and Contracted Internal Auditors for Audit purposes.

11. Information acquired by HBSTC from any source (unless already public), or generated during laboratory activities, shall be kept confidential by personnel as well as members of management, external bodies, contractors, or other parties unless obliged by law to reveal.

12. HBSTC is committed to safeguarding impartiality by making decisions based on fact and unbiased evidence, not allowing influence of its decisions, judgement and professional integrity

PART E: Test Report

1. Within 14 working days, the test report will be issued, provided all conditions are adhered to.

It will confirm the performance rating in SANS 613:2011 excl. par 5.7 and whether the test sample complies or fails.

2. If the test is successful, a standard Test Report will be issued.

3. If the test is not successful, a failed Test Report will be issued, detailing the nature of the failure, supported by pictures
